

Small Group Exercise
Deer River Permit

Looking at the Deer River Permit, discuss the following questions among your group and write down an answer. After each question, we will discuss with entire class.

1. What are the emission points?
2. What pollutants are regulated at these emission points?
3. Can you tell how much pollution (in tons/yr) is emitted? If not, where would you find emissions information?
4. How is compliance with the NO_x limit determined?
5. How frequently is testing required? Where did this frequency come from ?
6. How is compliance with the SO₂ limit determined? Should we be concerned with SO₂? Why?
7. Is EU1 subject to an emission limit? Why?
